About

Earth Hugging Supplies.

Earth Hugging Supplies (EHS) is a South Australian garden specialist group that offers a wide range of environmentally friendly synthetic turf products. With immense respect for our environment and mother earth's beautiful nature, our central vision is to supply as many eco-friendly products as possible. A range of our products are manufactured in zero carbon emission supply chains, and some are made with totally recyclable materials. Being conscious of global warming, we will do our best to offer more environmentally friendly products and reduce the carbon footprint as much as possible.

Whilst we do our best to be respectful to the environment with our eco-friendly product range, quality and affordability are of the utmost importance. By combining these valuable elements, we will do our best to provide the best products with the highest quality at the lowest price.

We hope to gain your trust with our products and services and create beautiful indoor-outdoor surroundings for your enjoyment all year round.

Kind Regards,
EHS Team

Who we are?

Welcome to Earth Hugging Supplies (EHS), a leading provider of high-quality artificial turf solutions. We are a dynamic and innovative company that specializes in providing premium synthetic grass products to customers across the country.

At Earth Hugging Supplies (EHS), we have a team of experienced professionals dedicated to providing our clients with exceptional customer service. Our team includes experts in artificial turf wholesale, installation, and logistics, who work together to ensure that our customers receive the best products and services.

Our company values quality, sustainability, and innovation, and we are committed to staying at the forefront of the latest developments in artificial grass technology. Our synthetic grass products are made from the highest quality materials and are designed to withstand the toughest conditions, making them ideal for a wide range of applications.

We offer a wide variety of synthetic grass products, including landscaping turf, sports turf, and pet turf, to meet the unique needs of our customers. We also offer customized solutions to meet specific project requirements, such as synthetic grass for rooftops or indoor applications.

We are passionate about providing our customers with the best possible products and services. Whether you are a landscaper, a sports facility manager, or a pet care provider, we are here to help you find the perfect artificial turf solution to meet your needs.

In summary, Earth Hugging Supplies (EHS) is a leading high-quality artificial turf solutions provider. Our team of experts is dedicated to providing our customers with exceptional customer service and the best possible products. We are committed to quality, sustainability, and innovation.

Kind Regards,
EHS Team

Our. mission

" We use sustainable artificial grass to create smart green living environments with innovations that complement nature. "

The floor covering business is an extensive business in Australia, encompassing multiple companies as well as sales and trades personnel. At Earth Hugging Supplies (EHS) it is our passion to provide a distinguished service to our customers. Our mission is to fill the gaps currently present in the flooring industry by providing access to products that are seen much less frequently in the market. Our primary focus is to provide materials that are more eco-friendly hence reducing the environment footprint, whilst still allowing our customers access to guilt-free, luxurious, and affordable floorings!

Nature

100% Recyclable

Most of the material used to manufacture synthetic grass is the backing part of the grass which is generally composed of Latex, PU, and chemical coatings. However, "Nature" is made from 100% natural and recyclable fibers. That makes the Nature product the most environmentally friendly option, in which we take pride.

Ultralight Weight

The material and technology used to manufacture the "Nature" synthetic grass has made the final product 30% lighter than similar products. The lighter weight of this product not only makes transport much easier, but also reduces the effort required to for cutting and installation of this lovely product.

Nature

100% Recyclable

Ultralight Weight

Superior Drainage

The backing of the "Nature" product accelerates water desorption from the synthetic grass by five times. In normal synthetic grass, holes are made in the backing to allow water flow, however with "Nature", water desorption occurs automatically from the entire backing surface making the process up to five times faster.

Weed Barrier

Breeze

Self-Cooling

You may have heard that synthetic grass absorbs heat excessively especially under Australia's harsh sunshine, making it virtually unusable in the summer when temperatures rise. This problem is partially resolved with the "Breeze". The synthetic silk used in the production of "Breeze" is made from special substances incorporated with special technology to reduce the grass temperature by roughly 20%. This is an excellent feature when it comes to synthetic grass. But that's not all!

Anti-Bacterial

Breeze

Self-Cooling

Anti-Bacterial

Bacteria tend to grow wherever they find a suitable growth Environment. When it comes to artificial grass, this is generally between the synthetic fibers of the grass. The "Breeze" has a complete anti-bacterial coating, giving you peace of mind for your family's health and well-being.

Anti-Bacterial

Mold-Proof

We all love our synthetic lawns to continuously look natural and fresh. There are some categories of synthetic grass which tend to lose their natural form and colour over time. However, the high quality of raw materials used to manufacture "Breeze" has made this product hardy and long lasting. JFA tests show that the "Breeze" synthetic grass preserved its original form and colour even after four weeks of continuous vigorous tests.

Mold-Proof

Chlorine Resistance

If you are looking for poolside synthetic grass, the "Breeze" is undoubtedly the best choice. Chlorine largely impacts the fibers of synthetic grass leading to breakdown and discoloration of the grass. The chlorine-resistance technology used to manufacture "Breeze" helps the structure of this product to stay intact with overtime chlorine exposure. This chlorine resistance technology also stops discoloration, making this product a great choice for the poolside areas.

Seawater Resistance

If you live in a coastal area with humid weather, "Breeze" could still be a suitable choice for your outdoor needs. Quality tests show that seawater and humidity have no negative impact on the grass backing and the product preserves its quality, form and colour.

Besides these five unique features, which are not easy to find in one product, the "Breeze" is also luxuriously soft making it resemble natural grass!

The "Breeze" is one of the best choices when it comes to synthetic grass.
